GstarCAD 2015

CAD SOFTWARE SOLUTION

www.gstarcad.si

Works simple, Works flawlessly

GstarCAD 2015 addresses your drawing needs with new and stunning features which hasten not only workflow but also your revenue!

What's New in GstarCAD 2015

- Sheet Set Manager
- PDF Underlay
- Barcode & 2D Barcode
- .Net Framework Support
- Cloud Storage
- Enhancements

User Interface Enhancement

Regarding to user interface enhancement, this version offers a new theme interface supplied by a customized ribbon with lighter icons that provides clearest interface, improving drawing space visualization. Furthermore users can link to our website to get information and directly download the GstarCAD mobile application through the new tab called (Applications) that has been added to the ribbon.

Sheet Set Manager

Managing large sets of drawings manually can be complicated and time consuming. With the Sheet Set Manager, you can manage drawings as sheet sets plus manage and edit data, automate drawing set up, provide easy access to department drawings, simplify publishing/printing of the entire design set (or any part thereof).
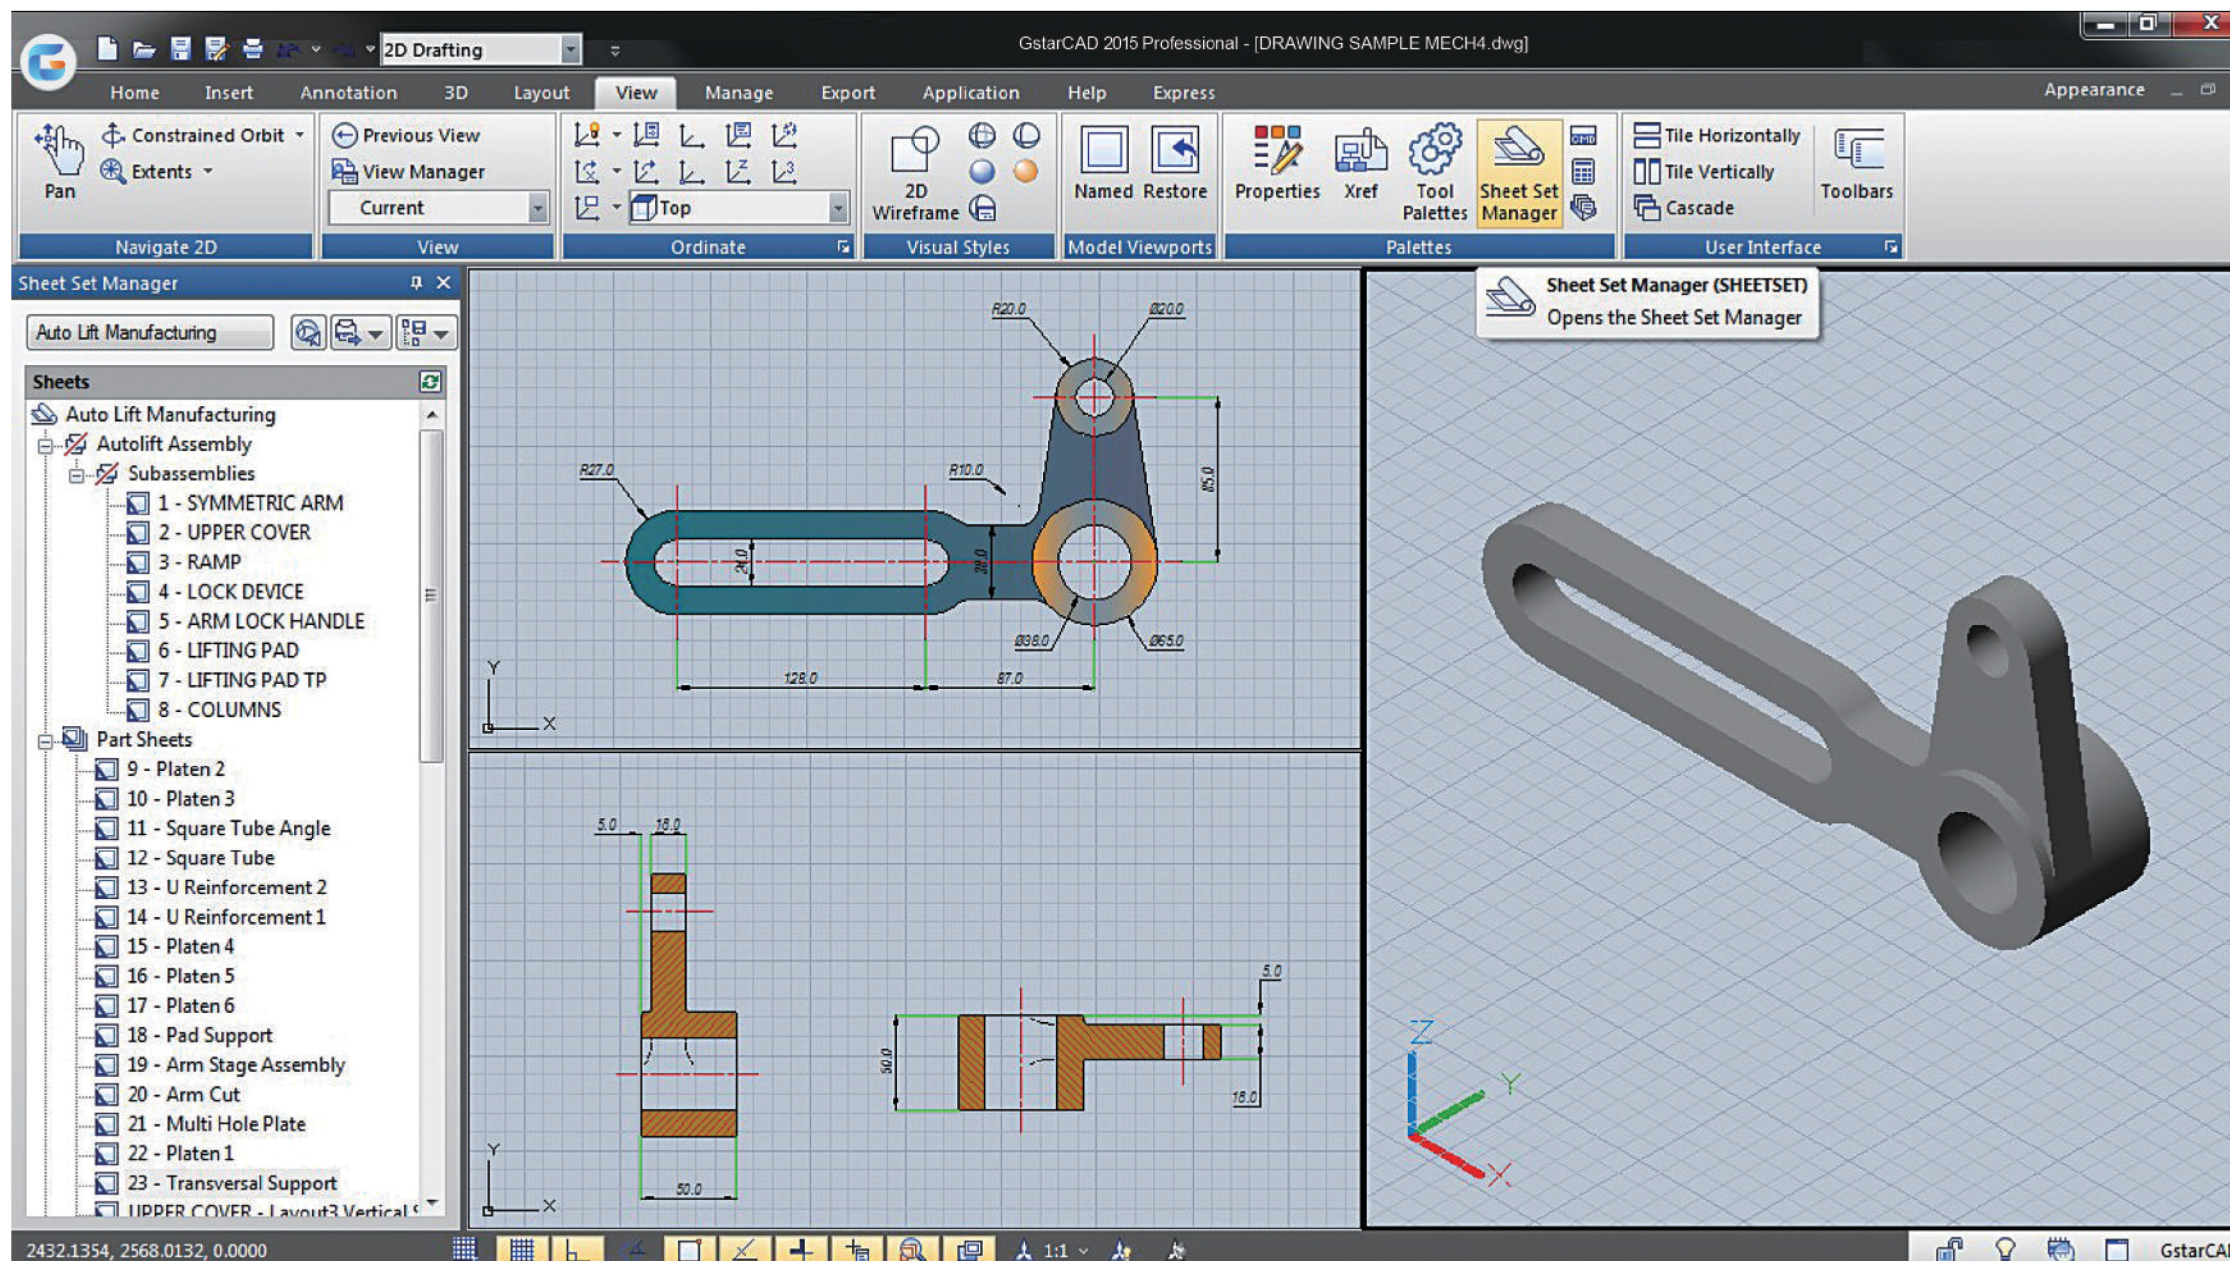

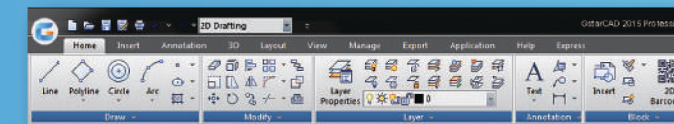

.Net Framework Support

GstarCAD .NET API enables you to manipulate the application and drawing files programmatically with libraries that are exposed and can be accessed by many different programming languages and environments. Users are able to automate tasks such as creating and modifying objects stored in the database of a drawing file or change the contents of a customization file.

PDF Underlay

You can reference and place a PDF as underlay in drawing files the same as you do raster image files. You can adjust the underlay properties like contrast, fade, monochrome, and colors for background.

Commands Enhancement

Commands like line, pline, circle, rectangle, copy, and rotate have been enhanced through new options that help to cut-down repetitive task on basic operations.

Cloud Storage

Collaborative capability between different fields like design, engineering, and project team work together efficiently thanks to cloud storage support. View and share data in the cloud using desktop and mobile devices is now possible in this version.

Barcode & QR Code

GstarCAD 2015 introduces Barcode & QR Code, an innovative features that will impact the way of storage and trace relevant drawing data in the CAD industry.

Barcode & QR Code can be inserted to the drawings, accomplishing identification and correspondence between paper and electronic drawings.

QR Code technology can achieve a wide range of applications, such as: product security / traceability, advertising push, website links, data download, etc. Users can insert a QR Code in a drawing in graphical form, it can save drawings related information like drawing name, project name, company name, company website, even company LOGO picture, then you can quickly access the information through mobile phones, tablet computers and other devices in QR Code scanning tools.
