ADVANCED SOLUTION

AxisVM enables you to take advantage of several advanced analysis methods.

FAIR PRICES

AxisVM is a Synonim for the most cost-effective structural Software Solution for Structural Engineers!

EASY TO LEARN

AxisVM enables you a simple and fast migration from previous Software, with little effort. Software is easy to use, with geat Support and Education programs.

AxisVM is a globally recognized Software used by many Engineers around the world. Users in Europe most often point out the following advantages:

▶ **MODERN IN SIMPLE USER INTERFACE**

The User Interface is simple and transparent, with vast set of commands and options. Be creative also in 3D perspective!

▶ **STRUCTURAL DESIGN**

Design structural elements such as Beams, Columns, Trusses, Foundations, etc. Design all types of structures (wood, steel, concrete, XLAM).

▶ **BIM COMPATIBILITY**

Take Advantage of BIM Software! AxisVM is compatible with several BIM Software solutions like ArchiCAD, Revit, ALLPLAN, etc.

▶ **EFFECTIVE LOAD ASSIGNMENT**

Take advantage of fast and automatic load assignments with Snow and Wind Generator etc.

▶ **PRECISE RESULTS AND REPORTS**

Quickly produce accurate and detailed Reports with all Calculations in accordance with Eurocode Standards.

▶ **QUICK AND EFFECTIVE**

Without limitations, you can model, analyze and design even the most difficult projects, without time consuming and repetitive procedures.

▶ **SUITABLE FOR COMPLEX PROJECTS**

With AxisVM you can create even the most complex structures. It is suitable for all types of structures.

▶ **WIDE RANGE OF APPLICATIONS**

AxisVM is compatible with many Software and can be used along with Software like Grasshopper, Dynamo, IDEA StatiCa etc., which helps you to greatly improve your advanced workflow.
