GstarCAD 2025 Network License Manager Guide

GstarCAD Network License encryption mode enables you to share a number of GstarCAD licenses on your office LAN. It gives flexibility of license floating among a working group. Before the network installation, you should specify the server computer to install GstarCAD 2025 Network License Manager.

1. GstarCAD Network License Manager Installation and Settings

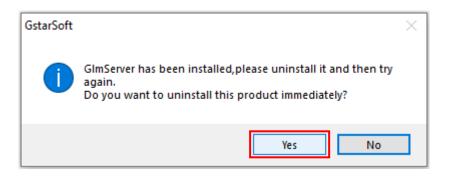

1.1. Installation

Please follow the steps below to install and set the configurations:

1. Double click "glm-Setup" to install GstarCAD 2025 Network license Manager.

2. You can choose whether start the server immediately or start it later.

3. You will find a tray icon with exclamation mark shown in the taskbar after installation has been completed. And there will be a tips like "Service is not found. Please check your settings" before you set the configurations.

4. Click GstarCAD Network License Manager icon and click Options to set the configurations

	it License Service' >	
License manage	r	
Options		
About		
Exit		G

5. Set the configurations as below:

G Options	>	×
System		
Run this s	server at Windows startup	
License service	e	1
Log path:	C:\ProgramData\GstarsoftLicenseService\Gl	
Service port:	1024 (Valid port: 1024 - 64000)	
License port:	27000 (Valid port: 27000 - 27009)	
	OK Cancel	

System:

Run this server when Windows startup: When this options is checked, GstarCAD License Manager can be restarted automatically when Windows startup.

Remark: "Run this server when Windows startup" option will not affect the license status.

License service:

Log Path: You can specify a path to save the license logs and the path should allow LocalService to write in, otherwise the license service will fail to run. If your operation system is Windows 10, the default path ProgramData is recommended.

Service port: The valid range should among 1024-64000.

License Port: The valid range should among 27000-27009.

6. After the configurations have been set, the exclamation mark with change to check mark.

1.2. Settings

1. Click GstarCAD Network License Manager icon and select License Manager option to load license manager box.

You can activate, return the GstarCAD network licenses online or manually, you can repair the license when it shows error message in license manager. The users whom are sharing your network license and lend detail also can be found in license manager.

3. Check The Users Who Activated The Network License from Your Server

GstarCAD network license supports a pool of licenses (nodes) on the server and users who have the authorization (server IP and license Port) can activate the corresponding version from their side in the same LAN. When a user quits GstarCAD 2025, the license will automatically be returned to license manager. From the License Details, you can see the network license activation information. Select the correct product and click License Details from License manager.

License Key	Product version	Expiration D	License Status	Node	Borrow	Online Number	Refresh
3401-E907-0700-0300-71CF-078F	. GstarCAD,Plus,2025,en-US	11-Jun-2024	Fully Trusted	2	0	1	Online Activate
							Manual Activat
							Online Return
							Manual Return
							Online Repair
							Manual Repair

							Borrowed Deta
							Statistical Detai
<						>	

For example: If your network license has three nodes and three users activated and using currently, there will be no available nodes left for other users to activate or borrow. If one of the three activated users quits GstarCAD 2025, the node will be returned to license manager, and there will be one license available which can be activated or borrowed.

User name	Machine name	Number	Duration	
OVS	ovs-PC	1	00:00:12	

4. Check the Users Who Borrowed the Network License from Your Server

GstarCAD network license allows users to borrow nodes from the server for a certain period. The license manager list shows the number of borrowed nodes and the number of available nodes left. The Borrowed Details option shows the information about the borrowed nodes.

For example, if your network license has a total of three nodes, and one user has borrowed a node from the server, then there will only be two available nodes left that can be activated or borrowed. The borrowed license can be automatically returned to the server on the expiration date, or the user can return it manually at any time during the validity period.
